

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): An information processing apparatus comprising:
generating means for generating ~~the playback designation information~~ one or more
PlayList files specifying ~~[[the]]~~ a sequence of reproducing ~~[[the]]~~ an information recorded on
a recording medium, and ~~[[the]]~~ generating a management information file supervising said
~~playback designation information~~ one or more PlayList files; and
recording means for recording said ~~playback designation information~~ one or more
PlayList files and said management information file, ~~generated by said generating means~~, on
said recording medium;
said management information file containing ~~[[the]]~~ a resume PlayList file name
information ~~pertinent to the name assigned to said playback designation information at a time~~
~~point of completion of playback which is based on said playback designation information~~;
which indicates a name of a particular PlayList file at a time point of completion of
playback which is based on said particular PlayList file; and
said ~~playback designation information~~ particular PlayList file containing ~~[[the]]~~ a
temporal information on ~~[[a]]~~ said time point of completion of ~~reproduction which is based~~
~~on said playback designation information~~ playback.

Claim 2 (Currently Amended): An information processing method comprising:
a step of generating ~~the playback designation information~~ one or more PlayList files
specifying ~~[[the]]~~ a sequence of reproducing ~~[[the]]~~ an information recorded on a recording
medium, and ~~[[the]]~~ generating a management information file supervising said ~~playback~~
~~designation information~~ one or more PlayList files; and

a step of recording said ~~playback designation information~~ one or more PlayList files and said management information file, ~~generated by said generating means~~, on said recording medium;

said management information file containing ~~[[the]]~~ a resume PlayList file name information ~~pertinent to the name assigned to said playback designation information at a time point of completion of playback which is based on said playback designation information~~;

which indicates a name of a particular PlayList file at a time point of completion of playback which is based on said particular PlayList file; and

said ~~playback designation information~~ particular PlayList file containing ~~[[the]]~~ a temporal information on the time point of completion of reproduction which is based on said playback designation information.

Claim 3 (Currently Amended): A recording medium having recorded thereon a computer-readable program, ~~said computer-readable program including~~ that when executed by a processor perform steps comprising:

a generating step of generating ~~the playback designation information~~ one or more PlayList files specifying ~~[[the]]~~ a sequence of reproducing ~~[[the]]~~ an information recorded on a recording medium, and ~~[[the]]~~ generating a management information file supervising said ~~playback designation information~~ one or more PlayList files; and

a recording step of recording said ~~playback designation information~~ one more PlayList files and said management information file, ~~generated by said generating means~~, on said recording medium;

said management information file containing ~~[[the]]~~ a resume PlayList file name information ~~pertinent to a name assigned to said playback designation information at a time point of completion of playback which is based on said playback designation information~~;

which indicates a name of a particular PlayList file at a time point of completion of playback which is based on said particular PlayList file; and

said playback designation information particular PlayList file containing ~~[[the]]~~ a temporal information on the time point of completion of reproduction which is based on said playback designation information.

Claim 4 (Canceled).

Claim 5 (Currently Amended): An information processing apparatus comprising: for reproducing the

a playback mechanism configured to reproduce main information from a recording medium having recorded thereon ~~the playback designation information~~ one or more PlayList files specifying ~~[[the]]~~ a playback sequence of said main information ~~recorded~~ and ~~[[the]]~~ a management information file supervising said ~~playback designation information~~ one or more PlayList files, ~~said apparatus comprising; and~~

control means for controlling ~~[[the]]~~ a playback of the main information on said recording medium based on said management information file containing ~~[[the]]~~ a resume PlayList file name information ~~pertinent to a name assigned to said playback designation information at a time point of completion of playback~~ which indicates a name of a particular PlayList file at a time point of completion of playback which is based on said particular PlayList file, ~~performed in accordance with said playback designation information, and on said playback designation information~~ said particular PlayList file containing ~~[[the]]~~ a temporal information on said time point of completion of playback ~~performed in accordance with said playback designation information.~~

Claim 6 (Currently Amended): An information processing method comprising: [[for]]
reproducing [[the]] a main information from a recording medium having recorded
thereon ~~the playback designation information~~ one or more PlayList files specifying [[the]] a
playback sequence of said main information ~~recorded~~ and [[the]] a management information
file supervising said ~~playback designation information~~ one or more PlayList files[[,]] said
method comprising[[:]]; and

a control step of controlling [[the]] a playback of the main information on said
recording medium based on said management information file containing [[the]] a resume
PlayList file name information ~~pertinent to a name assigned to said playback designation~~
~~information at a time point of completion of playback~~ which indicates a name of a particular
PlayList file at a time point of completion of playback which is based on said particular
PlayList file, and performed in accordance with said ~~playback designation information~~, and
on said ~~playback designation information~~ particular PlayList file containing [[the]] a temporal
information on said time point of completion of playback ~~performed in accordance with said~~
~~playback designation information~~.

Claim 7 (Currently Amended): A recording medium having recorded thereon a
computer-readable program for an information processing apparatus that when executed by a
processor performs a method comprising: [[for]]

reproducing [[the]] a main information from a recording medium having recorded
thereon ~~the playback designation information~~ one or more PlayList files specifying [[the]] a
playback sequence of said main information ~~recorded~~ and [[the]] a management information
file supervising said ~~playback designation information~~ one or more PlayList files said
program method-including comprising: and

a control step of controlling ~~[[the]]~~ a playback of the main information on said recording medium based on said management information file containing ~~[[the]]~~ a resume PlayList file name information ~~pertinent to a name assigned to said playback designation information at a time point of completion of playback~~ which indicates a name of a particular PlayList file at a time point of completion of playback which is based on said particular PlayList file, and performed in accordance with said ~~playback designation information~~, and on said ~~playback designation information~~ said particular PlayList file containing ~~[[the]]~~ a temporal information on said time point of completion of playback ~~performed in accordance with said playback designation information.~~

Claim 8 (Canceled).

Claims 9-23 (Canceled).
